

```
public class Contact {  
    private String name;  
    private String phone;  
  
    // Constructor  
    public Contact(String name, String phone) {  
        this.name = name;  
        this.phone = phone;  
    }  
  
    // Getter for name  
    public String getName() {  
        return name;  
    }  
  
    // Getter for phone  
    public String getPhone() {  
        return phone;  
    }  
  
    // Override toString for nice display  
    @Override  
    public String toString() {  
        return name + " | " + phone;  
    }  
}
```
